# Transitioning an Assignment to Turnitin LTI

The following steps will walk you through the process of enabling Turnitin using the LTI integration. This is the supported method for using Turnitin within Canvas.
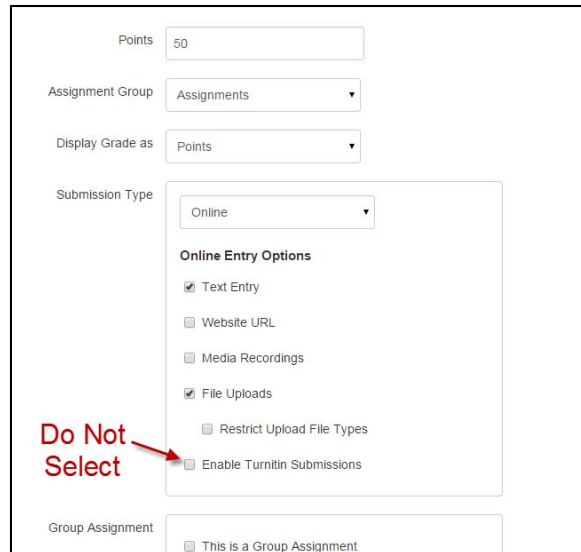

If you have any questions about the transition please contact the USF Department of Academic Technology via email at dat@stfrancis.edu or phone 815-740-5080.

1. Select the assignment and click the **Edit** button

2. Insure the basic settings of the assignment are correct (i.e. Instructions, Due Dates, Points, Rubric, Availability Dates)

3. Make sure that **Enable Turnitin Submissions** is not selected.

4. Change the **Submission Type** to **External Tool**

5. Click the **External Tool URL** field (1), then select **Turnitin LTI** from the **Configure External Tool dialog** (2), and finally click the **Select** button.

6. Save the assignment

7. On the assignment page click the Turnitin **Settings**.

8. Verify the settings are correct including Due Dates, Start Date, and Max Grade. These should have been pulled in from Canvas.

9. Click the **Optional Settings** link

10. Determine if you want to include options such as "Allow late submissions?" and "Allow students to view Originality Reports?"
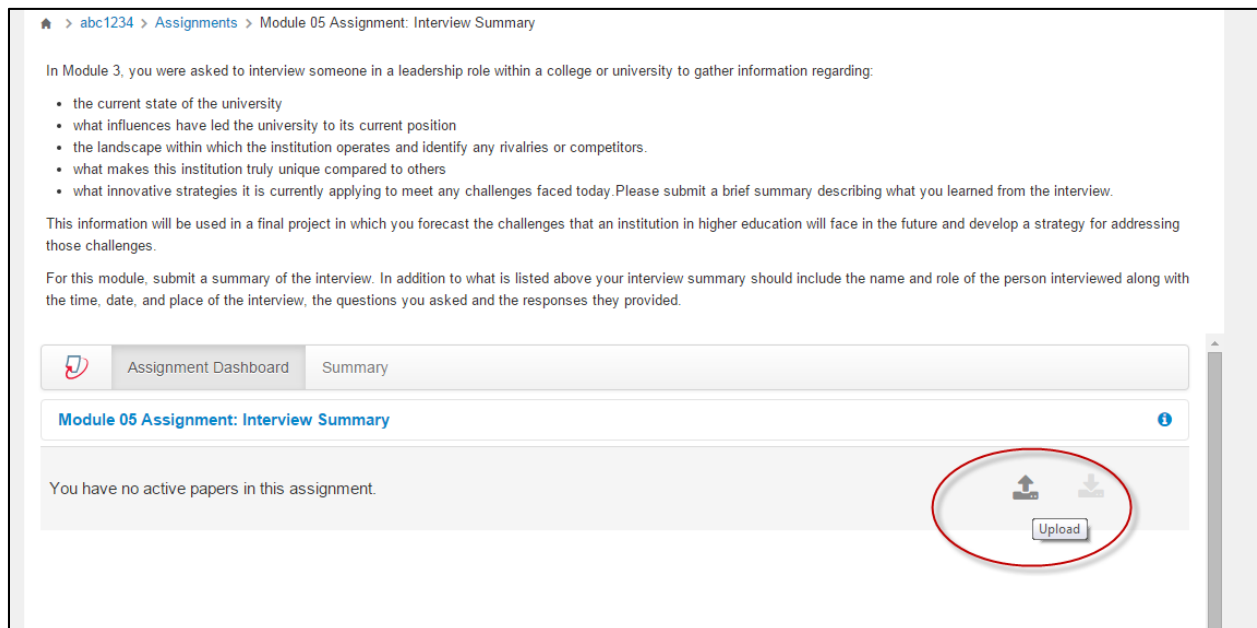

11. Click the **Submit** button to save any changes
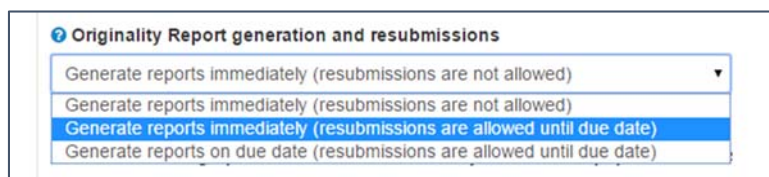

Key Points to Remember:

- Canvas rubrics will not be visible to students once you transition to the Turnitin LTI integration. We recommend either creating a copy of the rubric within the assignment instructions or linking to a document containing the rubric.

- You may grade the assignment using Speedgrader as you have always done. The Canvas rubric will still be available.

- We recommend adding submission instructions such as:

  *Click the upload icon to submit your assignment. Follow the prompts. Be sure to click the **Accept Submission – Save** button to complete the process.*

 The following screen shot shows the view from the student's perspective.

- Turnitin is not viewable when using Canvas' Student View feature.

- Submitting multiple files at the same time is not supported with the Turnitin LTI integration.

- Resubmissions are supported through Turnitin's **Optional Settings.** Your options are available under **Originality Report generation and resubmissions.** Note that originality reports for resubmitted assignments will have a 24 hour delay.

IMPORTANT: Draft papers submitted to Turnitin via the LTI integration will be stored in the Turntitin system and become part of future evaluation sets. If a final version of the same paper is submitted; it may flag the entire paper in the originality report. To avoid this we recommend you set up draft assignments as follows:
1. On the assignment page click the Turnitin **Settings**.

2. Click the **Optional Settings** link

3. Under **Submissions to this assignment will be stored in:** choose **Do not store the submitted papers**

4. Click the **Submit** button to save any changes
