How to place a Canvas Studio Video into Canvas Content

Anytime you place a Canvas Studio video into Canvas content, you are using the "rich content editor" which has a tool for selecting and embedding a Canvas Studio video. The rich content editor is found in such artifacts as content pages, assignments, announcements, and discussion topics and replies. This will show you how it works.

From the perspective of editing an unpublished content "page" in Canvas, first put the page in editing mode.
Next, write a paragraph that introduces the video.

1. Hit the return key so the cursor is on the next line down.
2. Then from the "plug-in" tool shown in the image below, select "Studio."
   (If "Studio" is not on the drop down menu, choose "View All" and find it.)

You have the option to upload a video from your computer if you wish when the Studio window opens.

Otherwise select a video that was previously uploaded to Studio.

If you wish to create a discussion of the video, keep the Display Media Tabs option. Click "Embed"

Save and Publish the page.
